DOMAIN PURCHASE GUIDE

• • •

NAMECHEAP.COM

Step 1: Sign Up

Go to https://www.namecheap.com and click on "Sign Up" on the top left to create an account.

Fill in the form to create your Namecheap account. You may be asked to confirm your email.

Step 2: Search

Once you're logged in, go back to the homepage. Enter the name of the domain you want to buy and click on search.
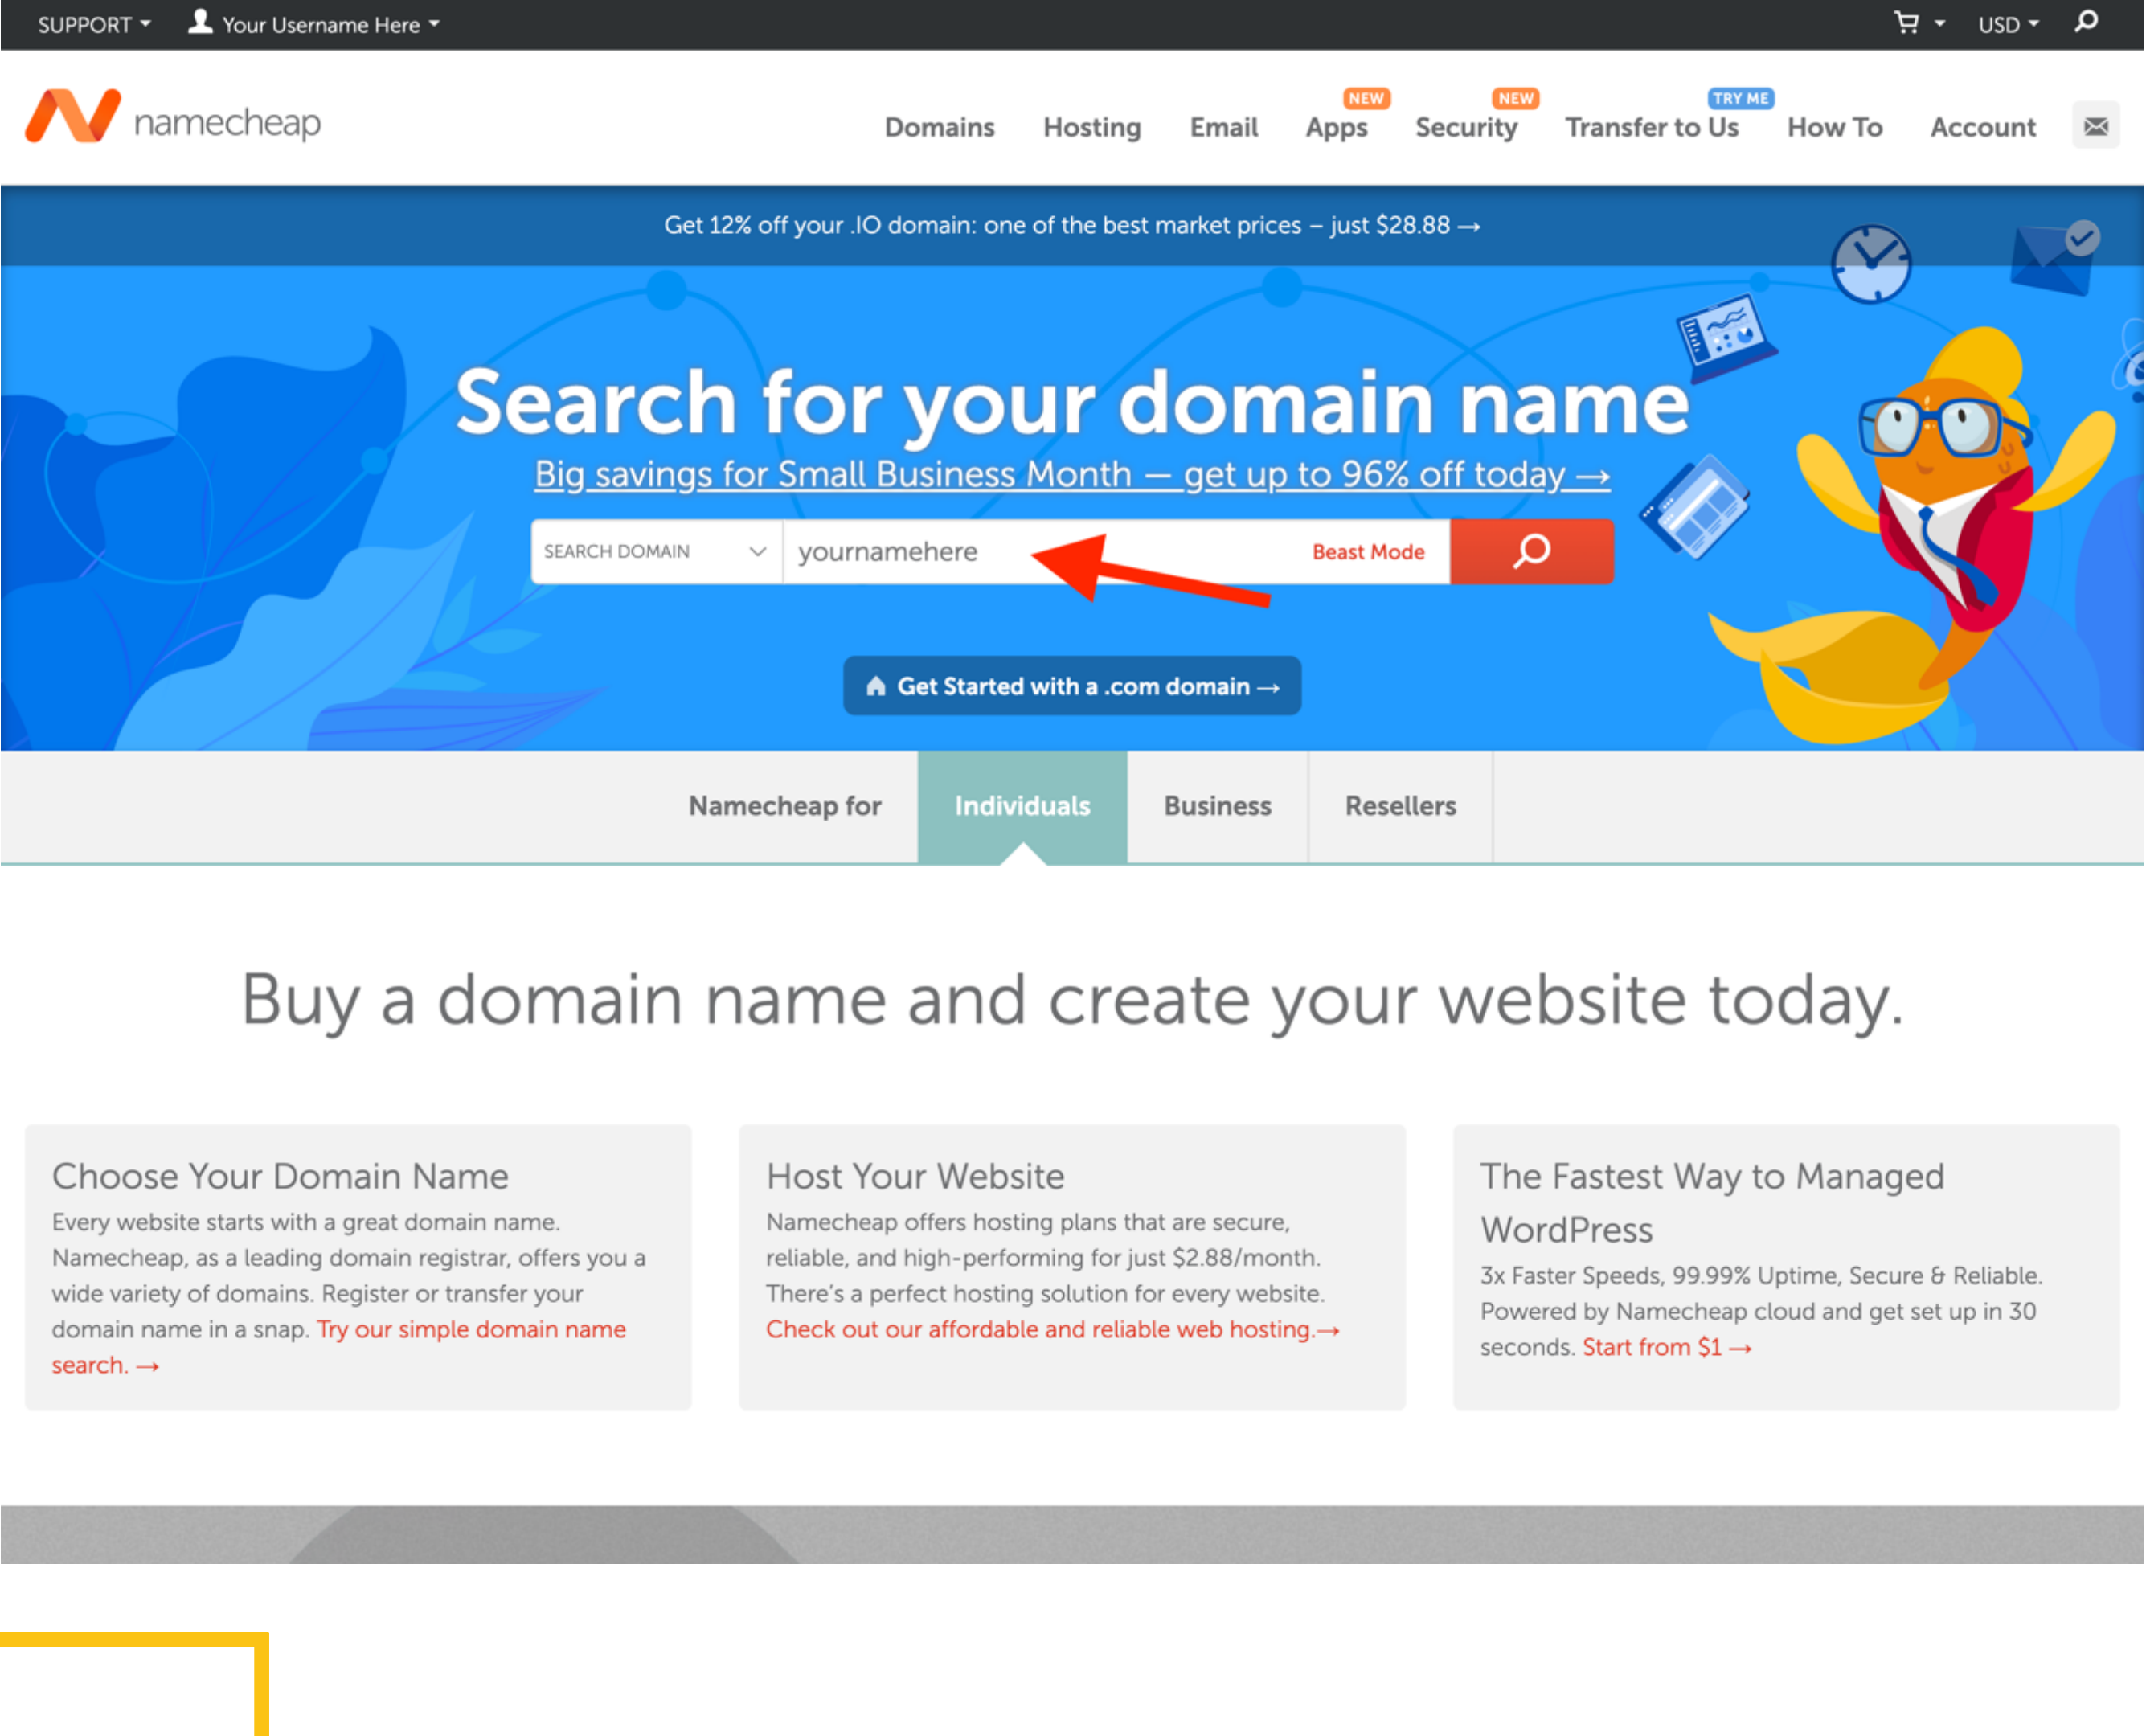

Step 3: Choose Your Domain

Namecheap will show you a list of all the domains that are available, and their prices. We recommend getting a .com domain if it's available.

If the name you want isn't available, you can choose a different extension (such as .net) or go back and repeat your search for a different name (e.g. "yournameofficial" instead of "yourname".)

Click on "add to cart" when you're ready.

Step 4: Get Domain Privacy

Make sure WhoisGuard domain privacy protection is enabled. This protects your private information (such as name and address) for anyone looking up the ownership details for your domain.

This is free for all Namecheap customers.

Click on "confirm order" to continue.

Step 5: Add Payment Method

Enter your payment method here.

On this page, under "receipt details", leave the default contact selected.

Under "renewal settings", we recommend turning auto-renewal for your domain so you don't need to worry about losing it in the future.

Click "continue" and you'll be taken to a page where you can confirm your order and check out.
